

## R E M A R K S

The above amendment is supported by the description at page 54, lines 11-12 and the facts that benzoic acid and naphthoic acid cited in the last paragraph on page 54 have 7 carbon atoms and 11 carbon atoms, respectively. Thus the error and the correction of the error are inherent from the specification as filed.

The Replacement Sheets include Figures 1-5.

The Replacement Sheets are attached without changes as formal drawings.

Respectfully submitted,

CLIFFORD J. MASS  
MADAS & PARRY
